Why, publish these Memorandums for the people, of course.

"The Perestroika Deception" explains the devious secret intent behind the Leninist strategy which the 'former' Communists are pursuing under cover of fake 'reform' and 'progress towards democracy.' The immediate strategic objective is 'convergence' with the West - on their terms, not ours. The ultimate objective is Lenin's: replacement of nation states with collective regional governments as building blocks of the 'New World Social Order-World [Communist] Government.

The five videos were produced at a two-day seminar held in Noxon, Mt. on August 26-27, 1995. By special invitation, only people from all across the northwest learned and included their expertise on the subject of "Combat Medicine." The seminar was taught by Chuck Fenwick a former Corpsman in the Army, Navy and Air Force. During the Viet Nam Police Action (war) Chuck encountered all kinds of wounds -- from mosquito bites to limbs blown off by bombs. In attendance were First Responders, Advanced E.M.T.'s and a Paramedic Instructor.

by World Survival Institute (1 hr. 30 min.)

**NOTE:** The Combat Medicine Seminar held in Noxon, MT was a fabulous learning experience. So much was crammed into two days it made my head spin. However, every militia cell throughout America, needs a copy of this set. If the situation every arises, be it walking through a gang infested area, etc, the skills you will learn may save your life or somebody else's. Also, Tape No. 166, is an excellent resource video when it comes to plant medicine. There are many books on the subject, but very few videos. We highly recommend this tape. If you are in the wild and do not have access to medical technology, the plant next to you may save your life.

### **No. 465: WILD CARDS**

by Linda Runyon (52 cards)

Being raised in the Patriot/Militia/Survivalist movement there are not too many products that excite me anymore. However, when I had seen these cards I knew they were the answer to one of the items I needed for my pack.

There are many excellent books on the subject of wild-edible plants. However, most weigh five (5) pounds (feels like it anyway) which is not very practical for a back pack. These cards fit the bill.

52 of the most common edible plants are shown in color, where they grow, which part is edible, characteristics, uses and hints. And best of all they only weigh a total of 3 1/2 ounces and double as real playing cards.

In fact, I am going to get extras for my brief case, vehicles and of course the rest of my family. I highly encourage you to do the same. **\$10.00**
